In the current era, printers have become an essential device among users. But buying a reliable and affordable quality printing machine can be a complicated business. However, Canon printer is considering one of the top-notch devices as it provides high-quality printouts in less time. That's why; it is been accessible by many people from all over the world. But being technical device, glitches could also arise when you print something from your Canon Printer. At such circumstances, users are required to Change Ink in Canon Printer or replace the ink cartridge at reasonable rate. In the blog-post, you will learn the right ways of changing the ink on your printer. Hence, go through from top-to-toe! Getting the best in class printing feature can only be availed when there is genuine and enough ink cartridges filled into the container. In case the ink gets out of stock or the level of ink is very low, then you won't obtain color printouts with clarity. Therefore, if your Canon Printer not printing or not delivering quality print, instead of being worried, let's give a glance on this post. Here, you will get satisfying solution to such printer problem. Points To Remember Before Begin To Change Ink in Canon Printer Here are lots of important points you should consider before start changing the ink cartridge or replacing the ink cartridge in Canon printer. Give a look at them and keep them in your mind while Change Ink in Canon Printer. You are always suggested to make use of a new genuine ink cartridge instead of using the third-class or non-effective ink cartridge because it may cause the printhead clogging of nozzles. If you take decision to remove the cartridge from your Canon Printer, then immediately replace the ink and hence increase the level. Use a clean white cloth to wipe out the ink cartridge. Never leave the ink cartridge door open in your printing machine after removing its packaging and filling the ink one-by-one. Use an ink cartridge with a proper date of use and try to use it as per the mentioned date. Required Steps to Change Ink in Canon Printer Follow the below-noted guidelines in order to efficiently change the Canon Printer ink cartridge: First and foremost what you recommended to do is to open your Canon printer's access door very carefully and make sure that you open it by using the support brace which is located on the cover's right side. In the next step, you will have to remove the already stored ink cartridge from its container and then require to remove the protective tape from the new cartridge as well that will further have to install Afterward, move forward the ink cartridge into the empty slot in a way to contacting the metal faces inside the slot and then after couple of while release it Now, close the access door of your Canon printer and then wait for couple of minutes until the indicator light of your printer blinks After that, you can take a print test to ensure that the ink cartridge has properly been changed and there is no any other issue with ink cartridge. On the other hand, in spite of changing the ink cartridge in Canon Printer, you can put ink appropriately in Canon Printer. In the below you will see how! Steps To Install the Correct Ink Cartridge in Canon Printer Isn't your Canon Printer delivers great quality of printed documents? If it is really so, then you are required to instantly put the ink in your Canon printer. After refilling the ink into the empty ink cartridge, you can simply start printing anything and receive the printouts without any distraction. But it is mandatory having the proper knowledge regarding filling the ink in your printer. If you want to know about how to put ink in Canon printer with efficacy, then you can without any worry go through the steps mentioned underneath: First of all, you have ensured about your printer that it is turned off and disconnected from the power source. If this is not, then simply disconnect it from the wall-outlet. Now slightly open the front cover of your Canon printer Remove any paper that are stuck from the paper tray Now open the paper output cover and then glimpse carefully for the empty ink cartridge inside the printer After that, push down the empty ink cartridge in order to remove it Now you are free to fill the ink inside the ink cartridge with the applicable mode and make sure that you are using the original ink manufactured by Canon The next step you need to do is, replace the ink cartridge into the new one and then place it into the proper place After that, close the printer access door and turn your printer on by connecting it back to the power source or wall-outlet Now, print a test page to check whether the printer is printing properly or not. If even after applying the steps above to Change Ink in Canon Printer, you are yet not receiving the quality printouts, move to the next instructed lines. Steps To Replace Ink In Canon Printer Do you really want to replace any faulty and existing ink cartridge in your Canon printer? If yes, then you can very easily and smoothly replace it with the new ink cartridge only when you walk through the below procedure: First of all, open the access door of your Canon printer properly Now, push down the empty ink cartridge to release it out and then pull the cartridge Now, remove the protective tape applied on the new ink cartridge After that, insert the new ink cartridge into the proper place Now close the access door of your printer and then wait until the cartridge goes to the resetting position in a very well-manner Now take a print test to check whether replacing the ink cartridge is work out for you or not. Contact Canon Printer Support For Instant Help This afore-mentioned information is suggestible to all users who are searching to learn how to Change Ink in Canon Printer. Once you consciously went through the give guidance, it will be easy and simple for you to change the ink cartridge. But in case you are still not capable of replacing or changing the ink on Canon printer, then you can make direct connection with us through proffered helpline number. We, the highly expert team will assist you in no time with 100% satisfaction. When remaining ink cautions or errors occur, the ink lamps and the Alarm lamp will flash to inform you of the error. In this state, the printer cannot print or scan. Count the number of flashes and take appropriate action. When you need to replace a FINE cartridge, follow the procedure below. Important Do not touch the electrical contacts (A) or print head nozzle (B) on a FINE cartridge. The printer may not print properly if you touch them. If you remove a FINE cartridge, replace it immediately. Do not leave the printer with the FINE cartridge removed. Use a new FINE cartridge for replacement. Installing a used FINE cartridge may cause the nozzles to clog. Furthermore, with such a FINE cartridge, the printer will not be able to inform you when to replace the FINE cartridge properly. Once a FINE cartridge has been installed, do not remove it from the printer and leave it out in the open. This will cause the FINE cartridge to dry out, and the printer may not operate properly when it is reinstalled. To maintain optimal printing quality, use a FINE cartridge within six months of first use. Note If a FINE cartridge runs out of ink, you can print with either color or black FINE cartridge, in whichever ink remains, only for a while. However the print quality may be reduced compared to when printing with both cartridges. We recommend to use a new FINE cartridge in order to obtain optimum qualities. Even when printing with one ink only, print with leaving the empty FINE cartridge installed. If either of the color FINE cartridge or black FINE cartridge is not installed, an error occurs and the printer cannot print. For information on how to configure this setting, see below. Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified. Both color ink and black ink are also consumed in the standard cleaning and deep cleaning of the print head, which may be necessary to maintain the performance of the printer. When ink runs out, replace the FINE cartridge immediately with a new one. Make sure that the power is turned on. Retract the paper output tray and the output tray extension. Open the cover. The FINE cartridge holder moves to the replacement position. Caution Do not hold the FINE cartridge holder to stop or move it forcibly. Do not touch the FINE cartridge holder until it stops completely. Important The inside of the printer may be stained with ink. Be careful not to stain your hands or clothing when replacing the FINE cartridge. You can easily wipe off the ink from the inside of the printer with tissue paper or the like. Do not touch the metallic parts or other parts inside the printer. If the cover is left open for more than 10 minutes, the FINE cartridge holder may move and the Alarm lamp light. In this case, close the cover, then open it again. Remove the empty FINE cartridge. Push down the FINE cartridge until it clicks. Remove the FINE cartridge. Important Handle the FINE cartridge carefully to avoid staining of clothing or the surrounding area. Discard the empty FINE cartridge according to the local laws and regulations regarding disposal of consumables. Prepare a new FINE cartridge. Take a new FINE cartridge out of its package and remove the protective tape (C) gently. Important If you shake a FINE cartridge, ink may spill out and stain your hands and the surrounding area. Handle a FINE cartridge carefully. Be careful not to stain your hands and the surrounding area with ink on the removed protective tape. Do not reattach the protective tape once you have removed it. Discard it according to the local laws and regulations regarding disposal of consumables. Do not touch the electrical contacts or print head nozzle on a FINE cartridge. The printer may not print properly if you touch them. Install the FINE cartridge. Insert the new FINE cartridge at a slant into the FINE cartridge holder. The color FINE cartridge should be installed into the left slot and the black FINE cartridge should be installed into the right slot. Important Insert the FINE cartridge gently so that it does not hit the electrical contacts on the FINE cartridge holder. Push the FINE cartridge in and up firmly until it snaps into place. Important Check if the FINE cartridge is installed correctly. The printer cannot print unless both the color FINE cartridge and black FINE cartridge are installed. Be sure to install both cartridges. Close the cover. Note If the Alarm lamp lights or flashes after the cover is closed, take appropriate action. The printer may make noise during operation. Adjust the print head position. After replacing the FINE cartridge, align the print head. Note When print head alignment is performed, the printer starts cleaning the print head automatically before printing the print head alignment sheet. Do not perform any other operations until the printer completes the cleaning of the print head.
